Professional Summary

Data Analyst with a Finance and Accounting background, working in SQL and Power BI. Experienced in cleaning data, building models, and developing dashboards that track revenue performance and highlight operational issues. Currently developing Python through the GCI World 2026 program at the University of Tokyo.

Technical Skills

SQL & Databases: SQL Server, MySQL, CTEs, Window Functions, Joins, Subqueries, Views.

Business Intelligence: Power BI, DAX, Data Modeling, Star Schema, Dashboard Development, ETL

Data Transformation: Power Query, Power Pivot, Advanced Excel, PivotTables, VLOOKUP, XLOOKUP

Analytics: EDA, Root Cause Analysis, RFM Segmentation, KPI Tracking, Revenue Analytics.

Tools & Platforms: Salesforce CRM, GitHub, Microsoft Office Suite

Currently developing: Python (pandas, NumPy, Matplotlib), Advanced DAX

Projects

Olist Brazilian E-Commerce Analysis

Mar 2026

- Queried 99,441 orders across 8 source tables; resolved 547 duplicate review records using ROW_NUMBER() to preserve data integrity before modeling.
- Implemented a 5-table star schema in SQL Server and developed a 2-page Power BI dashboard, validating KPIs directly in SQL before reporting.
- Found a 7-day delivery gap between 1-star and 5-star reviews across \$15.84M revenue, resulting in a recommendation to improve delivery timelines to address low customer ratings.

MavenFuzzyFactory E-Commerce Hackathon

Mar 2026

- Processed 3 years of e-commerce data (472,871 sessions, 32,313 orders) as part of a 4-person team, presented findings and recommendations to stakeholders for DEBI Hackathon.
- Discovered a conversion bottleneck at the product detail page (43.4% vs. 68%+ elsewhere); estimated impact at \$2,446/month for each 10% improvement.
- Led 5 of 10 analytical challenges: data quality auditing, A/B test ROI, product performance, cross-sell analysis, and a \$100K strategic roadmap.

Adventure Works Business Intelligence

Dec 2025

- Delivered a full BI solution, building an ETL pipeline, star schema, and DAX measures to highlight \$202K in recovery opportunities across underperforming product lines.
- Integrated 4 fact models to evaluate a \$25M manufacturing business, tracing 30% of total machine downtime (1,323 hours) directly to raw material shortages.

Supply Chain Root Cause Analysis	Nov 2025
Investigated 3 years of logistics data using SQL CTEs and Window Functions; defined 32,000+ units in lost inventory as the main cause, redirecting focus from delivery delays to warehouse auditing.	

Strategic Sales & RFM Dashboard	Oct 2025
- Designed a data model in Power Pivot across ~10K records with 3 stakeholder views (Executive, Operations, Customer) tracking revenue trends and shipping performance. - Applied RFM modeling to spot premium accounts at risk of leaving, while assessing margin variances to isolate loss-making territories and transit methods for cost reduction in underperforming channels.	

Professional Experience

Back Office Advisor <i>FLINK Business Solutions</i>	Oct 2024 – Present
- Validated and audited high-volume datasets across Salesforce CRM and internal systems, maintaining 99% data accuracy across all reporting workflows. - Reconciled customer records using Salesforce and Advanced Excel; streamlined document verification workflows, reducing manual processing time and error rates.	
Customer Service Representative <i>e& UAE (Etisalat Global Services)</i>	Mar 2024 – Oct 2024
Resolved technical complaints for 30+ customers daily using root cause analysis to ensure first-call resolution and reduce repeat contacts.	

Education

Bachelor's Degree in Commerce	2018 – 2022
<i>Cairo University, Egypt Major: Finance & Accounting GPA: 3.4</i>	

Certifications & Training

Digital Egypt Builders Initiative (DEBI) — Business Analytics Track	Nov 2025 – Present
Intensive program: SQL, Power BI, Data Warehousing, Tableau, Python, Advanced Analytics	
GCI World 2026 — University of Tokyo	Apr 2026 – Present
14-week data science program	
Professional Diploma in Data Analytics — Alaa Essam Academy	May – Nov 2025
160-hour program: SQL Server, Power BI, Excel — end-to-end analytics workflows	
Corporate Finance Institute (CFI) via Coursera	Dec 2025 – Mar 2026
Intermediate DAX & Time Intelligence, Financial Statements in Power BI, Power BI Fundamentals, Power Pivot & Power Query Fundamentals, Data Analysis in Excel	
SQL Advanced & SQL Intermediate Certificates — HackerRank	Feb 2026
Introduction to Databases — Meta / Coursera	Jan 2026
Statistical Distributions — Rice University / Coursera	Nov 2025
