

Saleh Hossam

Data Analyst | SQL · Power BI · DAX · Python | Finance & Accounting Background

Cairo, Egypt | +20 103 420 7458 | salehhossam611@gmail.com | [linkedin.com/in/saleh-hossam](https://www.linkedin.com/in/saleh-hossam) | saleh-hossam.github.io | github.com/Saleh-Hossam

PROFESSIONAL SUMMARY

Data Analyst with a Finance and Accounting background, building end-to-end SQL and Power BI solutions — from raw data cleaning and star-schema modeling to dashboards that track performance and surface business decisions. Currently builds and maintains live reporting dashboards in a production back-office environment, with project experience spanning e-commerce, workforce analytics, and cybersecurity. Deepening Python and machine learning through GCI World 2026 at the University of Tokyo.

TECHNICAL SKILLS

SQL & Databases: SQL Server, MySQL, CTEs, Window Functions, Joins, Subqueries, Views
Business Intelligence: Power BI, DAX, Advanced DAX, Data Modeling, Star Schema, Dashboard Development, ETL
Data Transformation: Power Query, Power Pivot, Advanced Excel (financial modeling, Power Pivot integration)
Analytics: EDA, Root Cause Analysis, RFM Segmentation, KPI Tracking, Revenue Analytics
Machine Learning: Python (Pandas, NumPy, Matplotlib, Seaborn) · Developing: Scikit-learn, XGBoost — via GCI World 2026
Tools & Platforms: Salesforce CRM, GitHub, Figma, Microsoft Office Suite

PROFESSIONAL EXPERIENCE

Back Office Advisor (Data & Operations) — FLINK Business Solutions Oct 2024 – Present
Full-time · Cairo, Egypt
Analytics & Reporting

- Developed and maintained performance dashboards — AHT, utilization rate, task volume, and quality score — for team leads and management, surfacing operational trends used to flag service-level issues early.

Operational

- Validated and reconciled high-volume customer datasets and records across Salesforce CRM and internal systems, maintaining 99% data accuracy while streamlining document verification workflows to reduce manual processing time and error rates.

Customer Service Representative — e& UAE (Etisalat Global Services) Mar 2024 – Oct 2024
Full-time · Cairo, Egypt

- Resolved technical complaints for 30+ customers daily using root cause analysis to ensure first-call resolution and reduce repeat contacts.

ANALYTICS PROGRAMS

Data Science & AI Scholar — Matsuo-Iwasawa Lab, University of Tokyo Apr 2026 – Present
Program · Remote | GCI World 2026

- 3-month intensive, competitive international AI & data science program covering Python (NumPy, Pandas), machine learning, and SQL, applied to live cases for partner companies; assessed through weekly assignments, a data science competition, and a final project.
- Certificate awarded by the University of Tokyo upon completion.

Data Analyst — Digital Egypt Builders Initiative (DEBI) Nov 2025 – Present
Scholarship · Hybrid, Cairo | Government-Sponsored, Ministry of Communications

- Delivering data-driven recommendations through hands-on collaborations with private-sector partner organizations.
- Selected through a national application process for an 8-month government-sponsored business analytics program.
- Competed in the DEBI Business Analytics Hackathon with a 4-person team, placing 3rd nationally.

FEATURED PROJECTS

Cybersecurity Incident Analysis — Operation Swift Recovery [↗ GitHub](#) May 2026

- Tools:** Python, Pandas, NumPy, Matplotlib, MySQL
- Analyzed 15,500 attack events across 5 simultaneous vectors (DDoS, SQL Injection, Brute Force, XSS) using Python, Pandas, and MySQL; designed a composite danger score weighting attacks by business consequence rather than raw frequency.
- Identified a 24.2% WAF bypass rate for SQL Injection as the critical risk gap, confirmed coordinated attack timing within a 27.8-second window, and traced peak intensity to a deliberate overnight staffing exploit.
- Delivered a prioritized \$575K remediation roadmap — WAF tuning, SOC staffing, anomaly detection — projected to cut repeat-attack probability from 40% to under 10% within 12 months.

HR Analytics Dashboard [↗ GitHub](#) Apr 2026

- Tools:** Power BI, DAX, Power Query, Figma
- Built a 4-page Power BI dashboard analyzing attrition, performance, and workforce risk across 1,470 employees; prototyped the layout in Figma before development to sharpen the analytical narrative.
- Uncovered \$14.62M in total turnover cost, with Sales and Technology accounting for 95% of it (\$14.07M); flagged Data Scientists and Sales Executives as the highest-risk roles by headcount and attrition rate combined.
- Showed that overtime employees leave at nearly 3× the rate of non-overtime staff (30.53% vs. 10.44%), pointing to workload as a controllable driver of attrition rather than a structural one.

Olist Brazilian E-Commerce Analysis [↗ GitHub](#) Mar 2026

- Tools:** SQL Server, Power BI, DAX
- Queried 99,441 orders across 8 source tables; resolved 547 duplicate review records to preserve data integrity before modeling.
- Implemented a 5-table star schema in SQL Server and a 2-page Power BI dashboard, validating all KPIs directly in SQL before reporting.
- Found a 7-day delivery gap between 1-star and 5-star reviews across \$15.84M revenue; recommended targeted delivery timeline improvements to address low satisfaction scores.

EDUCATION

Bachelor's Degree in Commerce — Cairo University, Egypt · Finance & Accounting · GPA: 3.4 2018 – 2022

CERTIFICATIONS

Professional Diploma in Data Analytics — Alaa Essam Academy · May 2025 – Nov 2025 | 160 hrs: SQL Server, Power BI, Excel
Corporate Finance Institute (CFI) · Dec 2025 – Mar 2026 | Intermediate DAX & Time Intelligence · Financial Statements in Power BI · Power BI Fundamentals · Power Pivot & Power Query · Data Analysis in Excel
IBM · Machine Learning with Python (Jun 2026) · Data Visualization with Python (May 2026)
Supervised Machine Learning — DeepLearning.AI · May 2026
Introduction to Databases — Meta · Jan 2026
SQL Advanced & SQL Intermediate — HackerRank · Feb 2026
NumPy & Pandas: Analyze & Transform Data — EDUCBA · May 2026

LANGUAGES

Arabic (Native) · English (Fluent)
