PROJECTS

Olist Brazilian E-Commerce Analysis

2025

SQL Server · Power BI · DAX · Star Schema · Window Functions · CTEs

- Queried 99,441 orders across 8 source tables; resolved 547 duplicate review records using ROW_NUMBER() to ensure data integrity.
- Designed a 5-view star schema in SQL Server and built a 2-page Power BI dashboard — all business logic validated in SQL before connection.
- Uncovered a 7-day delivery gap between 1-star and 5-star reviews across \$15.84M revenue, proving delivery speed drives customer satisfaction.

MavenFuzzyFactory E-Commerce Hackathon

2026

MySQL · Conversion Funnel Analysis · A/B Testing · Cross-Sell Analysis

- Processed 3 years of e-commerce data (472,871 sessions, 32,313 orders) as part of a 4-person team, delivering an investor-grade presentation for DEBI Hackathon.
- Pinpointed a conversion bottleneck at the product detail page (43.4% vs. 68%+ elsewhere); quantified impact at \$2,446/month per 10pp improvement.
- Led 6 of 10 analytical challenges: data quality auditing, A/B test ROI, product performance, cross-sell analysis, and a \$100K strategic roadmap.

Adventure Works Business Intelligence

2025

Power BI · DAX · Star Schema · Data Modeling

- Built an end-to-end BI solution (ETL, star schema, DAX measures) tracking revenue trends; identified \$202K in recovery opportunities across underperforming product lines.

Supply Chain Root Cause Analysis

SQL Server · Power BI · Root Cause Analysis · Window Functions

- Explored 3 years of logistics data using SQL CTEs and Window Functions; defined 32,000+ units in lost inventory as the true root cause, redirecting focus from delivery delays to warehouse auditing.

2025

Telecom Customer Churn Analysis

Excel · Power Query · RFM Analysis · Churn Analysis

- Analyzed 7,000+ customers; discovered \$137K/month revenue loss driven by Fiber Optic users on month-to-month contracts churning at 40%, enabling targeted retention strategy.
