

Saleh Hossam

Data Analyst | SQL · Power BI · DAX · Python | Finance & Accounting Background

Cairo, Egypt | +20 103 420 7458 | salehhossam611@gmail.com | [linkedin.com/in/saleh-hossam](https://www.linkedin.com/in/saleh-hossam) | [saleh-hossam.github.io](https://github.com/saleh-hossam) | github.com/Saleh-Hossam

PROFESSIONAL SUMMARY

Data Analyst with a Finance and Accounting background. The move into analytics was deliberate — a finance foundation shapes which questions get asked before any query is written. Builds end-to-end in SQL and Power BI, from raw data cleaning and star schema modeling to dashboards that track revenue trends and surface business insights, across domains including e-commerce, supply chain, and cybersecurity. Currently deepening Python and machine learning through GCI World 2026 at the University of Tokyo.

TECHNICAL SKILLS

SQL & Databases: SQL Server, MySQL, CTEs, Window Functions, Joins, Subqueries, Views

Business Intelligence: Power BI, DAX, Data Modeling, Star Schema, Dashboard Development, ETL

Data Transformation: Power Query, Power Pivot, Advanced Excel (financial modeling, Power Pivot integration)

Analytics: EDA, Root Cause Analysis, RFM Segmentation, KPI Tracking, Revenue Analytics

Tools & Platforms: Salesforce CRM, GitHub, Figma, Microsoft Office Suite

Developing: Python (pandas, NumPy, Matplotlib), Advanced DAX

PROFESSIONAL EXPERIENCE

Data Science & AI Scholar — Matsuo-Iwasawa Lab, University of Tokyo

Apr 2026 – Present

Program · Remote | GCI World 2026

- 3-month intensive & competitive international AI & data science program covering Python (NumPy, Pandas), machine learning, SQL, and real business case applications; assessed through weekly assignments, a data science competition, and a final project.
- Certificate awarded by the University of Tokyo upon completion.

Data Analyst — Digital Egypt Builders Initiative (DEBI)

Nov 2025 – Present

Scholarship · Hybrid, Cairo | Government-Sponsored, Ministry of Communications

- Selected through a national application process for an 8-month government-sponsored business analytics program.
- Curriculum spans the full analytics stack: Excel, SQL, Power BI, Python, and applied business case solving.
- Competed in the DEBI Business Analytics Hackathon with a 4-person team, placing 3rd nationally.

Back Office Advisor (Data & Operations) — FLINK Business Solutions

Oct 2024 – Present

Full-time · Cairo, Egypt

- Validated and audited high-volume datasets across Salesforce CRM and internal systems, maintaining 99% data accuracy across all reporting workflows.
- Reconciled customer records using Salesforce and Advanced Excel; streamlined document verification workflows, reducing manual processing time and error rates.

Customer Service Representative — e& UAE (Etisalat Global Services)

Mar 2024 – Oct 2024

Full-time · Cairo, Egypt

- Resolved technical complaints for 30+ customers daily using root cause analysis to ensure first-call resolution and reduce repeat contacts.

PROJECTS

Cybersecurity Incident Analysis — Operation Swift Recovery [GitHub](#)

May 2026

- Analyzed 15,500 attack events across 5 simultaneous vectors (DDoS, SQL Injection, Brute Force, XSS) using Python, Pandas, and MySQL; built a composite danger score weighting attacks by business consequence rather than raw frequency.
- Identified a 24.2% WAF bypass rate for SQL Injection as the critical risk gap, confirmed coordinated attack timing within a 27.8-second window, and traced peak intensity to a deliberate overnight staffing exploit.
- Delivered a prioritized \$575K remediation roadmap — WAF tuning, SOC staffing, anomaly detection — projected to cut repeat-attack probability from 40% to under 10% within 12 months.
- Tools:** Python, Pandas, NumPy, Matplotlib, MySQL

Olist Brazilian E-Commerce Analysis [GitHub](#)

Mar 2026

- Queried 99,441 orders across 8 source tables; resolved 547 duplicate review records to preserve data integrity before modeling.
- Implemented a 5-table star schema in SQL Server and a 2-page Power BI dashboard, validating all KPIs directly in SQL before reporting.
- Found a 7-day delivery gap between 1-star and 5-star reviews across \$15.84M revenue; recommended targeted delivery timeline improvements to address low satisfaction scores. **Tools:** SQL Server, Power BI, DAX

- MavenFuzzyFactory E-Commerce Hackathon** [↗ GitHub](#)

Mar 2026

 - Processed 3 years of e-commerce data (472,871 sessions, 32,313 orders) as part of a 4-person team; presented findings and recommendations to DEBI stakeholders.
 - Discovered a conversion bottleneck at the product detail page (43.4% vs. 68%+ elsewhere), estimating \$2,446/month revenue impact for each 10% improvement.
 - Led 5 of 10 analytical challenges: data quality auditing, A/B test ROI, product performance, cross-sell analysis, and a \$100K strategic roadmap. **Tools:** *MySQL, Figma, HTML*
- Supply Chain Root Cause Analysis** [↗ GitHub](#)

Nov 2025

 - Investigated 3 years of logistics data using SQL CTEs and Window Functions; identified 32,000+ units in lost inventory as the primary cost driver — redirecting investigation from delivery delays to warehouse auditing.
 - Reframed the business problem from a symptom (late deliveries) to its root cause (inventory loss), enabling stakeholders to prioritize warehouse process controls over carrier renegotiation. **Tools:** *SQL Server, Power BI*
- Strategic Sales & RFM Dashboard** [↗ GitHub](#)

Oct 2025

 - Built a Power Pivot data model across ~10K records with 3 stakeholder views (Executive, Operations, Customer) tracking revenue trends and shipping performance.
 - Applied RFM segmentation to flag premium accounts at churn risk and isolated loss-making territories and transit methods through margin variance analysis. **Tools:** *Excel, Power Pivot, Power Query, DAX*

EDUCATION

Bachelor's Degree in Commerce — Cairo University, Egypt

2018 – 2022

Major: Finance & Accounting | GPA: 3.4

CERTIFICATIONS

Professional Diploma in Data Analytics — Alaa Essam Academy · May 2025 – Nov 2025 | 160 hrs: SQL Server, Power BI, Excel

Corporate Finance Institute (CFI) · Dec 2025 – Mar 2026 | Intermediate DAX & Time Intelligence · Financial Statements in Power BI · Power BI Fundamentals · Power Pivot & Power Query · Data Analysis in Excel

SQL Advanced & SQL Intermediate — HackerRank · Feb 2026

NumPy & Pandas: Analyze & Transform Data — EDUCBA · May 2026

Additional: Programming for Everybody (U of Michigan) · Analyze Markets: SWOT (Coursera) · Intro to Databases (Meta) · Statistical Distributions (Rice University)

LANGUAGES

Arabic (Native) · English (Fluent)
