

Saleh Hossam

Data Analyst | SQL · Power BI · DAX · Python | Finance & Accounting Background

Cairo, Egypt | +20 103 420 7458 | salehhossam611@gmail.com | linkedin.com/in/saleh-hossam | saleh-hossam.github.io | github.com/Saleh-Hossam

PROFESSIONAL SUMMARY

Data Analyst with a Finance and Accounting background. The move into analytics was deliberate — a finance foundation shapes which questions get asked before any query is written. Builds end-to-end in SQL and Power BI, from raw data cleaning and star schema modeling to dashboards that track revenue trends and surface business insights, across domains including e-commerce, supply chain, and cybersecurity. Currently deepening Python and machine learning through GCI World 2026 at the University of Tokyo.

TECHNICAL SKILLS

SQL & Databases: SQL Server, MySQL, CTEs, Window Functions, Joins, Subqueries, Views

Business Intelligence: Power BI, DAX, Advanced DAX, Data Modeling, Star Schema, Dashboard Development, ETL

Data Transformation: Power Query, Power Pivot, Advanced Excel (financial modeling, Power Pivot integration)

Analytics: EDA, Root Cause Analysis, RFM Segmentation, KPI Tracking, Revenue Analytics

Machine Learning: Python (Scikit-learn, XGBoost, Pandas, NumPy, Matplotlib, Seaborn) — Supervised Learning

Tools & Platforms: Salesforce CRM, GitHub, Figma, Microsoft Office Suite

PROFESSIONAL EXPERIENCE

Back Office Advisor (Data & Operations) — FLINK Business Solutions

Oct 2024 – Present

Full-time · Cairo, Egypt

Analytics & Reporting

- Built and maintained performance dashboards — AHT, utilization rate, task volume, and quality score — for team leads and management, surfacing operational trends used to flag service-level issues early.

Operational

- Validated and reconciled high-volume customer datasets and records across Salesforce CRM and internal systems, maintaining 99% data accuracy while streamlining document verification workflows to reduce manual processing time and error rates.

Customer Service Representative — e& UAE (Etisalat Global Services)

Mar 2024 – Oct 2024

Full-time · Cairo, Egypt

- Resolved technical complaints for 30+ customers daily using root cause analysis to ensure first-call resolution and reduce repeat contacts.

ANALYTICS PROGRAMS

Data Science & AI Scholar — Matsuo-Iwasawa Lab, University of Tokyo

Apr 2026 – Present

Program · Remote | GCI World 2026

- 3-month intensive, competitive international AI & data science program covering Python (NumPy, Pandas), machine learning, and SQL, applied to live cases for partner companies; assessed through weekly assignments, a data science competition, and a final project.
- Certificate awarded by the University of Tokyo upon completion.

Data Analyst — Digital Egypt Builders Initiative (DEBI)

Nov 2025 – Present

Scholarship · Hybrid, Cairo | Government-Sponsored, Ministry of Communications

- Competed in the DEBI Business Analytics Hackathon with a 4-person team, placing 3rd nationally.
- Selected through a national application process for an 8-month government-sponsored business analytics program.
- Delivering data-driven recommendations through hands-on collaborations with private-sector partner organizations.

PROJECTS

Cybersecurity Incident Analysis — Operation Swift Recovery [↗ GitHub](#)

May 2026

- Tools:** Python, Pandas, NumPy, Matplotlib, MySQL
- Analyzed 15,500 attack events across 5 simultaneous vectors (DDoS, SQL Injection, Brute Force, XSS) using Python, Pandas, and MySQL; built a composite danger score weighting attacks by business consequence rather than raw frequency.
- Identified a 24.2% WAF bypass rate for SQL Injection as the critical risk gap, confirmed coordinated attack timing within a 27.8-second window, and traced peak intensity to a deliberate overnight staffing exploit.
- Delivered a prioritized \$575K remediation roadmap — WAF tuning, SOC staffing, anomaly detection — projected to cut repeat-attack probability from 40% to under 10% within 12 months.

Olist Brazilian E-Commerce Analysis [↗ GitHub](#)

Mar 2026

Tools: SQL Server, Power BI, DAX

- Queried 99,441 orders across 8 source tables; resolved 547 duplicate review records to preserve data integrity before modeling.
- Implemented a 5-table star schema in SQL Server and a 2-page Power BI dashboard, validating all KPIs directly in SQL before reporting.
- Found a 7-day delivery gap between 1-star and 5-star reviews across \$15.84M revenue; recommended targeted delivery timeline improvements to address low satisfaction scores.

Customer Churn Prediction [↗ GitHub](#)

Jun 2026

- Tools:** Python, Scikit-learn, XGBoost, Pandas, NumPy, Matplotlib, Seaborn
- Built an end-to-end churn prediction model on 7,043 telecom customers, benchmarking Logistic Regression, Random Forest, and XGBoost; engineered features and addressed class imbalance with `class_weight='balanced'`.
- Achieved 0.83 ROC-AUC and improved recall from 51% to 79%, correctly identifying 296 of 374 churners; the balanced Logistic Regression outperformed both ensemble models on F1 score.

EDUCATION

Bachelor's Degree in Commerce — Cairo University, Egypt · Finance & Accounting · GPA: 3.4 2018 – 2022

CERTIFICATIONS

Professional Diploma in Data Analytics — Alaa Essam Academy · May 2025 – Nov 2025 | 160 hrs: SQL Server, Power BI, Excel
Corporate Finance Institute (CFI) · Dec 2025 – Mar 2026 | Intermediate DAX & Time Intelligence · Financial Statements in Power BI · Power BI Fundamentals · Power Pivot & Power Query · Data Analysis in Excel
Supervised Machine Learning — DeepLearning.AI · May 2026
SQL Advanced & SQL Intermediate — HackerRank · Feb 2026
NumPy & Pandas: Analyze & Transform Data — EDUCBA · May 2026

LANGUAGES

Arabic (Native) · English (Fluent)
